**REASONS FOR ALLOWANCE**

1. Claims 1-5, 7, 9-16, and 21 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art, either singly or in combinations, fails to anticipate or render obvious a substrate-supporting apparatus having a substrate-supporting surface having a concave portion including a depression slanting toward the center of the substrate-supporting surface, wherein only a peripheral portion of the back surface of the substrate, when loaded, contacts the slanting surface of the concave portion; a surface peripheral portion formed around the substrate-supporting surface, the surface peripheral portion having a lip portion which protrudes in a ring shape, the lip portion having a top surface and a slanted inner side surface continuing from the top surface and extending to the substrate-support surface to prevent a plasma from converging on either the lip portion or the substrate, said top surface being configured to be of substantially the same height as a top surface of the substrate when loaded, said inner slanted side surface being slanted outward at an angle greater than the substrate-supporting surface at a position contacting the substrate when loaded; a heating element embedded below the concave portion; a radio-frequency electrode of a metal element embedded below the concave portion; and no mechanical mechanism to clamp the substrate on the substrate-supporting surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
